**Subject:** I Don't Get It

Dear Attorney General Ashcroft,

I am still puzzled how Microsoft is harming anyone. All I see are corporations that can't compete on their own merit. I have use Microsoft and Netscape. I try all new products and always go back to Microsoft because it's just better and easier to use. I don't feel a case ever should have been brought against Microsoft from the Clinton administration. The DOJ has turned Microsoft into the days free money bank. It's like putting up a flag FREE MONEY, just file your court papers. This is criminal what America is doing to it's best and brightest corporation. Bundling is necessary and without Microsoft technology would not be where it is today. We should be thanking Microsoft not killing them. It's weighing down the entire stock market all these law suits. Lets get this over with, can't the process be made so Microsft won't keep facing a bottomless pit of law suits.

Sincerely,  
Candace Hawthorne
